WHIP Plus

Pg Pitchers

WHIP = Walks + Hits / Innings Pitched

WHIP Plus = Walks + Hits + HBP / Innings Pitched

A good WHIP for a pitcher is around 1.00.

Anything below 1.00 is outstanding and demonstrates the domination of a pitcher.

A poor WHIP is anything over 1.75.

The ML average is 1.41.

Ground Ball Outs/Fly Ball Outs

The higher the G/F ratio the better.

Fly Ball pitchers have a ground ball out to fly ball out ratio of less than 0.83, Ground Ball have a GO/AO ratio above 1.08.

Ip	Total Outs	GBOs	% of All Outs	FBOs	% of All Outs	Ks	% of All Outs	ER	ERA	Total Runs	TRA	Errors Made Behind	G/F Ratio

Pitching to Contact

PG Pitchers

Ideally, the Cost of Result should be greater than 0 because it means that the percentage of at bats is higher than the percentage of pitches. That means a pitcher is using his pitches effectively to achieve that result.

Pitches	Result	Number of Results	Pitches Per Result	Percentage Of Total Batters	-	Percentage Of Total Pitches	=	Cost of Result

What happens if 1st pitch is a Strike or Ball

PG

The hits include only legal base hits, not sacs.

The outs include outs made by anything other than a K, and errors.

The HBP's include any plate appearance that didn't end in an out, a K, a BB, or a hit.

The No AB's includes sacs, and any PA that isn't included in the other colums.

Percentages and Doubles

CC1

Sorted by Ahead Percentage

03/14/2010

This report shows the situation pitches are thrown. When a pitch is thrown, the pitcher is either ahead, behind or even in the count. The 1st 6 columns show whether the pitch was a strike or ball and the situation of the count. The next 6 columns simply show the percentages of what happened. The last four columns show how pitcher is throwing pitches to the same batter. If he throws successive balls or strikes to the same batter, it will be shown here.

Sorted by Ahead Percentage With Runners on

03/14/2010

This report shows the situation pitches are thrown. When a pitch is thrown, the pitcher is either ahead, behind or even in the count. The 1st 6 columns show whether the pitch was a strike or ball and the situation of the count. The next 6 columns simply show the percentages of what happened. The last four columns show how pitcher is throwing pitches to the same batter. If he throws successive balls or strikes to the same batter, it will be shown here.

Results on 0-2 Counts

PG Pitchers

This shows what happened when the batter started off with an 0-2 count.
Ideally, strikeouts + outs would be 100% and the other things would be 0%.
